SELF EVALUATION, PLAN AND DEVELOPMENT FORM

Name : Nabihah binti Taquddin Azmy	Supervisor 1	Supervisor 2
Title : Software Engineer	Name: John Ding	Name: John Lai
Date : 14-Jul-26	Designation: Manager	Designation: Manager

PERIOD OF REVIEW : 1 January 2026 to 30 June 2026

(1) Five Major Achievements (In order of importance) — **Self Rating**

1 Programme of Knowledge Transfer, Operation & Monitoring (PKTOM) Workshop Coordination
Coordinated the 3-day JPS workshop in Cyberjaya; managed presentation materials and schedule updates in close alignment with our developer team (VIA) to secure a smooth handover. — 5.00

2 Embedded Systems & Edge AI Implementation
Successfully programmed the ESP32-S3 AMOLED board for offline gesture recognition models (Edge Impulse) and configured the ESP32-S3-BOX-3 for voice/IR automation with zero prior hardware experience. — 4.00

3 Front-Line Warranty Support
Maintained MECHIS platform stability during its warranty window by resolving high-volume client/SCADA tickets and coordinating a 1TB MongoDB expansion with BPM. — 5.00

4 Support Ticketing System Development
Developed and deployed a functional internal issue-tracking web app using Node.js, Express.js, and Brevo SMTP on Vercel/Render. — 4.00

5 Technical Handover Management
Logged and structured the project handover from Atikah, establishing a basic, entry-level understanding of unfamiliar Flutter codebases and Raspberry Pi assets. — 4.00

(2) Three Major Skills (In order of importance)

1 Embedded & TinyML
Basic hardware flashing, toolchain setups (ESP-IDF), interface design (SquareLine Studio), and offline data training (Edge Impulse). — 4.00

2 Full-Stack Software Architecture & DevOps
Node.js/Express backend development, basic database tracking, and standard IIS server health checks for platform availability. — 4.00

3 Operational Liaison & Issue Management
Client support coordination, incident log translation, and cross-team communication tracking. — 5.00

(3) Training desired

Advanced TinyML & Computer Vision at the Edge

Cloud Architecture & Containerization

(4) Future Job Area desired

IoT & Intelligent Systems Engineering

Technical Project Lead

(5) Others (Free Description)

The First Half (H1) performance period from January to June 2026 has been a defining chapter for my career growth. Learning to interface code with physical hardware, specifically by building TinyML models on the ESP32-S3 AMOLED board and voice automation on the ESP32-S3-BOX-3 with zero prior experience, has been highly rewarding.

PERIOD OF PLAN: 1 July 2026 to 31 December 2026

(6) Major Targets (Include figures or milestones)

MECHIS Contract & SLA

Establish tracking parameters for the upcoming 2-year maintenance contract starting August 2026 while maintaining daily health checks and bug-patch validations.

Voice Recognition

Advance keyword spotting on the ESP32-S3 AMOLED board for stable, offline command detection.

Support Quality

Refine technical logs and developer briefs to deliver a highly structured, professional communication framework for stakeholders.

(7) Major Improvement Planned

Embedded Engineering Fluency

Advance from basic H1 hardware skills to master ESP-IDF toolchains and hardware debugging for reliable firmware development.

Process Automation

Automate manual hourly MECHIS system health checks with alerting scripts to reduce response times and enable proactive monitoring.

GUIDELINE

PERFORMANCE RATING

5 Outstanding	-	Consistently exceeds the job performance standards by a wide margin. on every facet of the job. Does an exceptionally fine job rarely achieved by others.
4 Superior	-	Performance is clearly and substantially above the required performance. Performance exceeds the normal standards in almost every area.
3 Fully Satisfactory	-	Performing on a sustained basis in all aspects of the job in a fully satisfactory manner.
2 Fair	-	Falls below the expected level of performance. Overall performance needs improvement in one or more areas.
1 Unsatisfactory	-	Performance is seriously deficient and immediate improvement is required.

SKILL LEVEL RATING

5 Outstanding
4 Above Average
3 Average
2 Satisfactory
1 Others

EXAMPLES OF SKILLS

1. C++ programming for computer vision

2. Design of Analog LSI for video signal processing

3. Design of DECT conformant handset

4. Architecture design of DSP for communication
